Since 1964, Conviron has been delivering controlled environment solutions to research facilities around the world. With clients that include many of the world’s largest corporate and academic research institutions, our products are relied on where precise environmental control is essential.
EDUCATION AND EXPERIENCE:
- Possesses 10+ years of relevant experience in a Quality Assurance role in a Manufacturing or Engineering environment.
- Bachelor’s Degree or higher in statistics, mathematics, operations research or related discipline.
- Proven ability in successfully leading and implementing Continuous Improvement initiatives.
- Experience implementing product and business Risk Management strategies.
- Skill in developing and maintaining KPI/metrics in an Engineering Design and Manufacturing Production environment.
- Proficient in quality assurance and quality control practices and record-keeping and process improvement methods.
- Controls, Electrical or Refrigeration knowledge would be considered an asset.

SKILLS AND ABILITIES:
- Independent with an inquisitive, analytic mind and a positive attitude.
- Hands-on and detail-oriented but also able to think strategically and view the business from a general management standpoint.
- Capable of operating in a fast-moving, ever changing environment and able to effectively deal with difficult situations.
- Excellent problem solving skills, decision making skills, and the ability to drive solutions to completion in a well-organized manner.
